

Toyota Forklift Part

Toyota Forklift Parts - Ever since 1992, Toyota Material Handling inc., U.S.A., also referred to as TMHU, have been the top selling lift truck supplier in the United States. This company has been based out of Irvine, California for well over 40 years, providing a comprehensive line of quality lift trucks. With a first-rate reputation of durability and reliability, Toyota lift trucks have thrived in the competitive resources handling market. Quality is the foundation of Toyota's renowned Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S.A are manufactured here.

All Toyota's manufacturing facilities within Canada and the U.S. comply with the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its commitment to relentless development and its environmentally friendly systems. It is the first and only producer to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70% fewer smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A.- Leading the Industry

The president of Toyota Material Handling, U.S.A., Brett Wood feels that TMHU's achievement comes from its dedication to produce high quality lift vehicles at the same time as providing first-rate client support and service. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues."• TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's largest lift truck provider and is amongst the magazines prominent World's Most Admired Companies.

Redefining Environmental Accountability

Toyota Industries Corporation, as the parent company, has instilled a rich corporate doctrine of environmental stewardship in Toyota. Not many other companies and no other lift truck manufacturer can match Toyota's record of protecting the environment while concurrently encouraging the economy. Environmental accountability is a key characteristic of corporate decision making at Toyota and they are proud to be the first and only producer to provide UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift trucks. Yet an added reason they remain a leader within the industry.

Toyota originally launched the 8-Series line of lift trucks in 2006, again exhibiting its leadership and innovation in the industry. Featuring an exclusive emission system that eclipsed both Federal EPA emission principles, and California's more environmentally friendly emission standards. The finished product is a lift truck that produces 70% fewer smog forming emissions than the present Federal standards tolerate.

Also starting in 2006, jointly with the Arbor Day Foundation, Toyota added to its dedication to the environment. To this day more than 58,000 trees have been embedded in the ground throughout state forests and neighborhood parks that were damaged by fires and other environmental causes. 10,500 seedlings have also been circulated through Toyota Industrial Equipment's system of sellers to non-profit organizations and neighborhood consumers to help sustain communities all over the United States

Toyota's lift vehicles offer superior durability, visibility, productivity, ergonomics, and all the foremost safety equipment that has made Toyota an industry leader. The company's System of Active Stability, often known as "SAS"•, helps lessen the chance of accidents and accidental injuries, in addition to increasing productivity levels while minimizing the potential for product and equipment damage.

System Active Stability can discern factors that could lead to lateral instability and potential lateral overturn. When any of these factors have been detected, the SAS will instantaneously engage the Swing Lock Cylinder to re-stabilize the rear axle. This changes the lift truck's stability footprint from triangular in shape to rectangular, providing a major increase in stability which substantially reduces the likelihood of an accident from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also assists to prevent injuries or accidents while adding stability.

SAS was originally released to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS has been built-in to the majority of Toyota's internal combustion machines. It is standard equipment on the latest 8-Series. There are more than 100,000 SAS-equipped lift trucks in operation, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with compulsory operator education, overturn fatalities across all models have decreased by 13.6% since 1999. Additionally, there has been an overall 35.5% decrease in industry wide collisions, loss of control, falls and tip overs from a lift vehicle for the same period.

Toyota's uncompromising standards extend far beyond the machinery itself. The company believes in offering general Operator Safety Training courses to help customers satisfy and exceed OSHA standard 1910.178. Instruction packages, video lessons and various materials, covering a broad scope of matters-from personal safety, to OSHA regulations, to surface and load conditions, are available through the dealer network.

Toyota has sustained a relentless presence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift truck. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in America now are built in the United States.

Situated in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126

acres. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service components, with the whole investment exceeding \$113 million dollars.

The modern NCC was designed to function for TMHU customers and sellers. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an area for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's history since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a instruction center.

TMHU has 68 authorized industrial equipment dealers, along with 189 dealership locations throughout the United States, providing the most complete and inclusive consumer support and customer service in the industry. The company's new and Certified Used lift vehicles, service, components, and financing features make Toyota dealerships a one-stop shop to ensure overall customer satisfaction.
